
Sketchup Plugin for Instant Road - Make Roads From Center Line!

A: Even if the question was asked by May 14, 2018 (see comments), the answer is "no". See their Marketing description of the plugin: Instant Road is not for generating basic terrain features. It is for creating complex terrain components such as waterways, roads, staircases and sidewalks. You won't be able to use the plugin to generate terrain that will integrate with "simple" terrain features such as "grassy fields" and "paved streets".
